Connor Riley

PhD Student, Infrastructure Optimization Lab
Georgia Institute of Technology

755 Ferst Drive, NW
Atlanta, GA, 30332
☎ (860) 338-4651
✉ connor.riley@engineer.uconn.edu

Education

Sept 2018 – Present	**Ph.D. Student, Operations Research**, *Georgia Institute of Technology*. Advised by Pascal Van Hentenryck
Sept 2016 – Aug 2018	**Ph.D. Student, Industrial and Operations Engineering**, *University of Michigan*. Advised by Pascal Van Hentenryck
May 2016	**B.S.E., Computer Science and Engineering**, *University of Connecticut*, *summa cum laude*. Minor: Mathematics; Honors Thesis: *Equivalent Representations of Circle Packings*

Experience

Sept 2018 – Present	**Georgia Institute of Technology**, *Student Researcher*, Atlanta, Georgia. Developing simulation, optimization, and artificial intelligence software for the design and operation of large-scale transit systems.
May 2016 – Aug 2018	**University of Michigan**, *Student Researcher*, Ann Arbor, Michigan. Developing simulation, optimization, and artificial intelligence software for the design and operation of multi-modal transit systems.
Sept 2015 – May 2016	**University of Connecticut**, *Student Researcher*, Storrs, Connecticut. Investigated equivalent representations of circle packings and algorithms to manipulate them.
Sept 2015 – May 2016	**Senior Design Project**, *Software Developer*, Storrs, Connecticut. Developed an android application to allow for synchronous music playback on multiple devices through p2p networking.
Dec 2014 – May 2016	**Center for Voting Technology Research**, *Undergraduate Research Assistant*, Storrs, Connecticut. Evaluated the functionality and security of various electronic pollbook solutions.
May 2015 – Aug 2015	**United Technologies Building & Industrial Systems (UTC) – Otis Elevator Company**, *Engineering Intern*, Farmington, Connecticut. Developed an application to translate UI labels, stored in XML, into the spoken language selected by the user.
Aug 2014 – Dec 2014	**Cigna Corporation**, *Software Development Intern*, Storrs, Connecticut. Created a role based access control dashboard to improve employee on-boarding.
June 2014 – Aug 2014	**Travelers Insurance Company**, *IT Intern*, Hartford, Connecticut. Coordinated completion of system change requests for an IBM mainframe.

Awards & Honors

2016	Graduate Fellowship, UM Industrial Operations Engineering Department
2015	Certificate of Outstanding Academic Achievement, UConn Computer Science and Engineering Department
2014	Babbidge Scholar, The University of Connecticut
2012 – 2016	Dean's List, UConn School of Engineering
2012 – 2016	Academic Excellence Scholarship, The University of Connecticut

---
Skills

General	C, C++, Java, Python, MATLAB, Gurobi, Bash, Git, CMake, Docker, Rancher LaTeX.
Parallel Computing	MPI, OpenMP.

Affiliations

2016 – Present Institute for Operations Research and the Management Sciences
2011 – Present Tau Beta Pi (The Engineering Honor Society)
2010 – Present Upsilon Pi Epsilon (The Computer Science Honor Society, Secretary for the University of Connecticut Chapter 2011-2012)
2010 – Present ACM (Association for Computing Machinery)

Publications

Conference & Journal Papers

[1] Kevin Pratt, Connor Riley, and Donald Sheehy. Exploring Circle Packing Algorithms. In Sándor Fekete and Anna Lubiw, editors, *32nd International Symposium on Computational Geometry (SoCG 2016)*, volume 51 of *Leibniz International Proceedings in Informatics (LIPIcs)*, pages 69:1–69:4, Dagstuhl, Germany, 2016. Schloss Dagstuhl–Leibniz-Zentrum fuer Informatik.

Posters & Presentations

[2] Antoine Legrain, Connor Riley, and Pascal Van Hentenryck. An on-demand multi-modal transportation system. In *21st Conference of the International Federation of Operational Research Societies (IFORS '17)*, Quebec City, Quebec, July 17-21, 2017.

[3] Tim Hull, Antoine Legrain, Ben Reeves, Connor Riley, Edward Fenwick, Jacob Ketter, and Pascal Van Hentenryck. Collecting data for an activity-based model of ann arbor. In *1st Michigan Institute for Data Science Symposium (MIDAS '16)*, Ann Arbor, MI, November 15-16, 2014.

[4] Tim Hull, Antoine Legrain, Connor Riley, and Pascal Van Hentenryck. A software architecture for an on-demand transit system. In *1st Michigan Institute for Data Science Symposium (MIDAS '16)*, Ann Arbor, MI, November 15-16, 2014.

[5] Ben Reeves, Connor Riley, Josh Lustig, Jane Zho, Will Burns, Kevin Jeoung, Jeff Sica, and Pascal Van Hentenryck. Pioneering campus-wide data collection through mobile apps. In *1st Michigan Institute for Data Science Symposium (MIDAS '16)*, Ann Arbor, MI, November 15-16, 2014.

[6] Connor Riley, Antoine Legrain, Ben Reeves, Jacob Ketter, and Pascal Van Hentenryck. An online greedy algorithm for an on-demand transit system. In *1st Michigan Institute for Data Science Symposium (MIDAS '16)*, Ann Arbor, MI, November 15-16, 2014.
